To whom it may concern:

This letter is to confirm that Skykansas performed work for us on a project in Topeka, Kansas in November 2009.

We employed Skykansas as a subcontractor to complete work another subcontractor had started. This original subcontractor's work was below industry standard; they didn't return phone calls or emails; and they jeopardized our relationship with the client. We were very dissatisfied and reached out to Skykansas to make the necessary repairs.

Tom Price worked closely with us to produce the quality of work our client expects. He was easy to get in touch with, responsive, and his team was timely, professional and efficient.

Based on Sky.com's performance and my opinion as a 20-year telecom veteran, I would be happy to work with them again on future projects and would be confident in recommending them to others. Should you have any further questions, please do not hesitate to call or email me.

Sincerely,

Pete Geelan
